

Added Sugars in Dried Fruit Products

(This statement does not expire and will only be updated if changes are required)

To All Graceland Fruit Customers,

Due to our dried fruit products being infused in a sucrose (cane sugar) infusion syrup the nutritional values for the amount of added sugars are calculated. This calculation is necessary because the fruit when passing through the infusion process will not fully uptake the total amount of sugar added to the process.

Our proprietary calculation which has been reviewed and approved by the FDA is based on the difference between the amount of total sugar in dried uninfused fruit and infused dried fruit.

Example: 10g total sugar Uninfused dried fruit
 26g total sugar Infused dried fruit
 16g added sugar

Respectfully,

Christopher J. Oberski
